

# NHICC – National Exam (Course Code NHI15)

## COURSESITES

Coursesites hosts our online exams. The following information provides an overview of the proposed Information, testing and assessment centre. **Interactive, Free Online Learning Platform**. CourseSites is a free, hosted online course creation and facilitation service that empowers individual K–12 teachers, college and university instructors and community educators to add a web–based component to their courses, or even host an entire course on the Internet. You even choose your own URL, so students can find your page easily.

The **NHICC National Exam** is comprised of a written and mandatory proctored exam for home inspectors that are utilized to test a participant’s general technical knowledge and understanding of professional practices related to a home inspection. You can practice freely here.

The NHICC permits free access to the exam site, to help participants attain a better understanding of what to expect and what the general requirements are to complete the final “proctored” home inspection exam through a recognized proctor and testing centre.

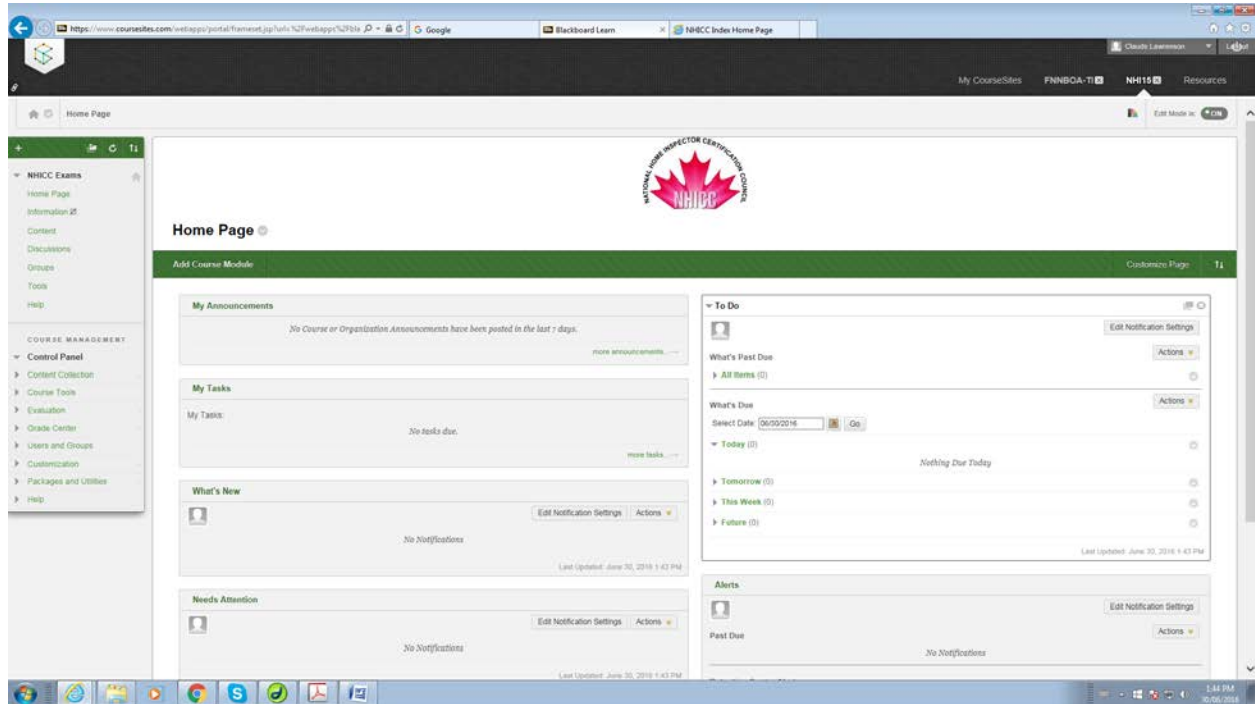

We hope that you take time to not only explore the site, but also take the opportunity to take our practice test to get a feel for what to expect on the “real thing”.

We also look forward to your feedback or even possible questions you may have regarding the home inspection profession.

**The following provides a visual overview of some of the course web screens. Login page.....**

If you don't have access you will need to sign up as a "student" or alternatively email NHICC at [info@nationalhomeinspector.org](mailto:info@nationalhomeinspector.org)

Home Page

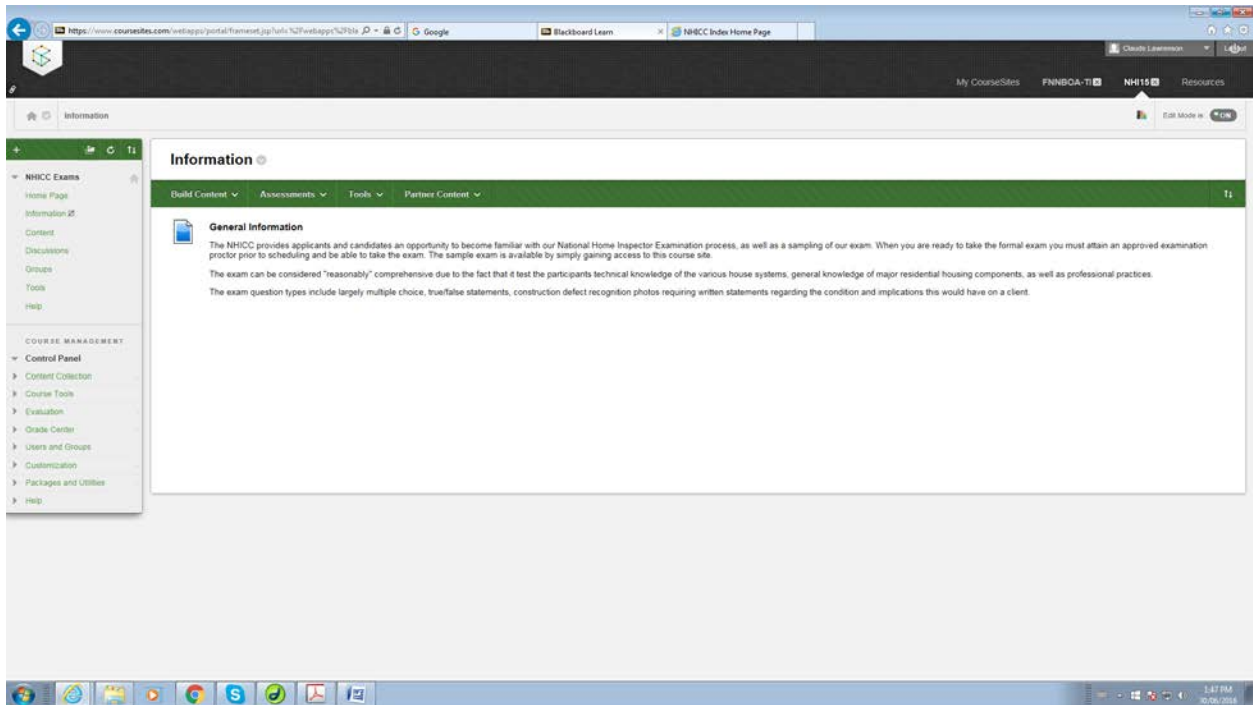

Page Orientation Notes:

Index of the various Course Pages available on the left hand side (click on one)

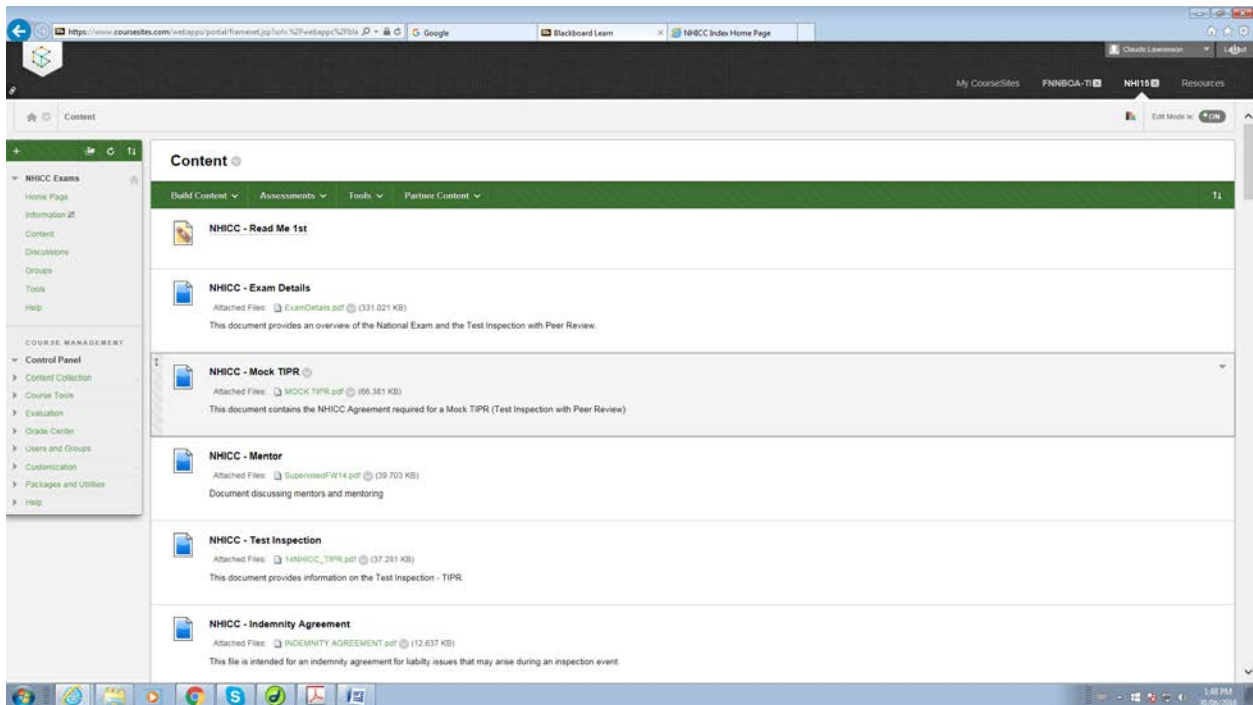

General Information and Announcements in the Centre portion

Items "To Do" listed on the right hand side

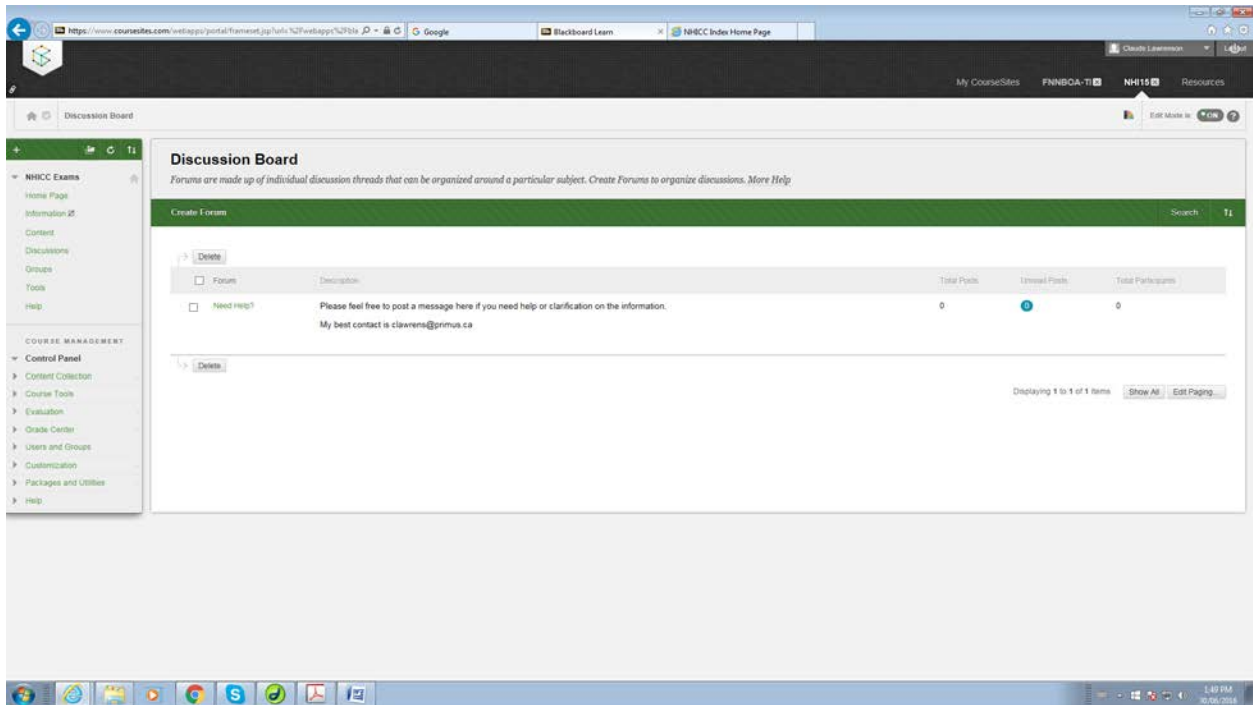

(Click on left hand column to proceed to "Information")

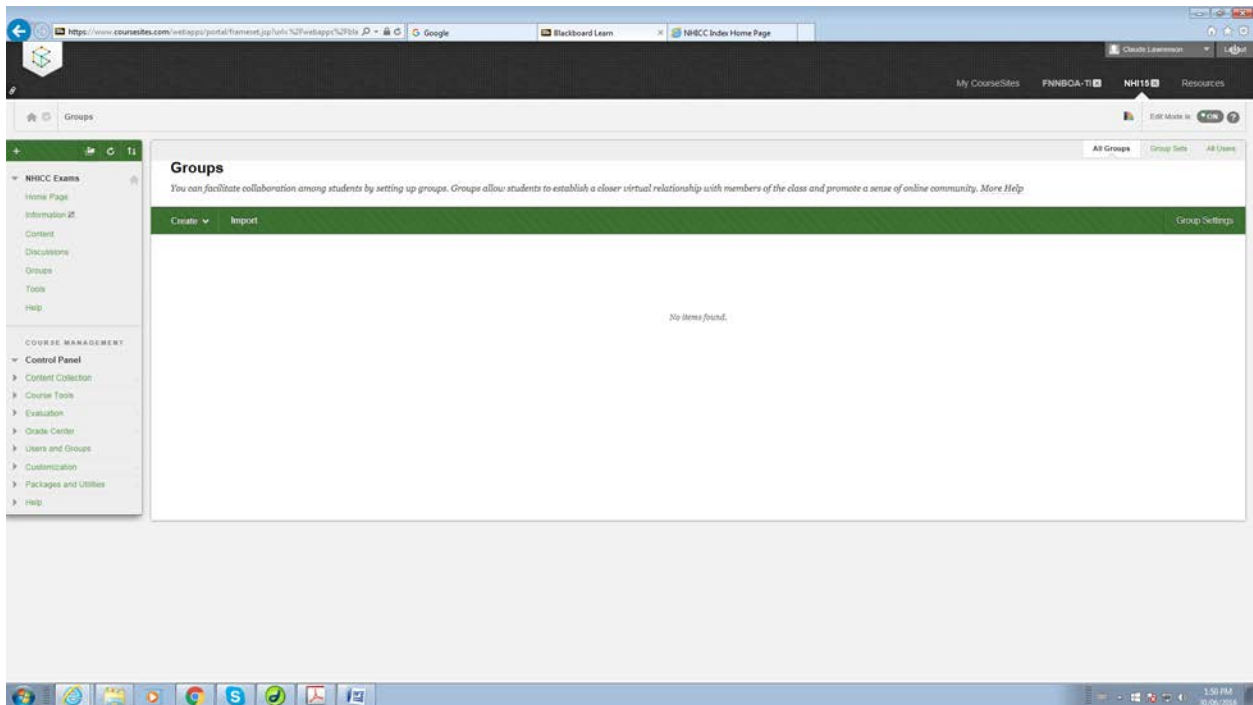

Information notes about the course goals

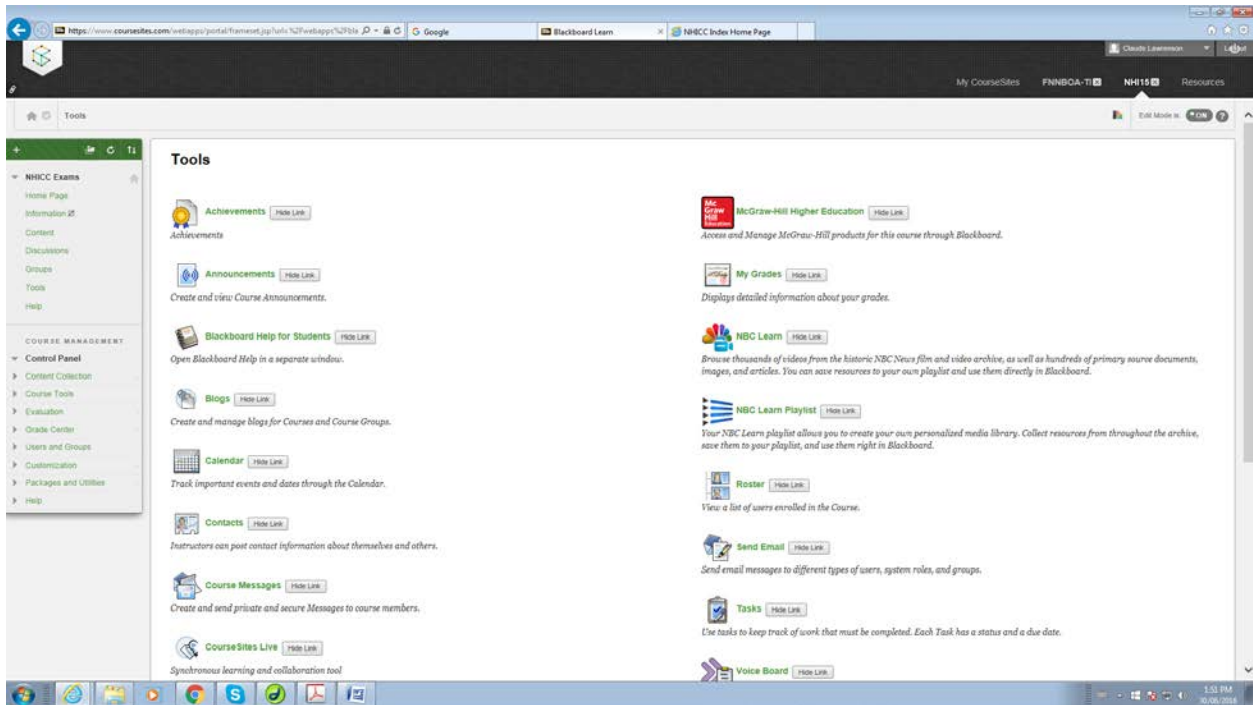

This screen shot provides a partial look at the "Content" page, scroll down for more

This screen shot is taken from the “Discussion” page (where information can be exchanged)

“Groups” can be created for study and preparation purposes if and when required

There are many “Tools” available for the course instructor to manage materials and interactions

Need “Help” ...there’s help available, if required.
